Engine versions: 2x two-phase (230V)
2x three-phase (380V)

Options and Equipment

- Fish pump
- Tube
- Extra long inlet hopper
- Dewaterer inlet hopper
- Additional fourth outlet
- Long version with four outlets
- Adjustable height
- Grader-lift optimal for RAS
- Installation on trailer, boat or raft
- Trailer hitch
- Fish counter

The way to grade Fish!

- High precision belt-grading-system
- Well proven and patented
- 4 different standard models
- Long lifetime
- Special design possible

Fish Grading Machines

We pamper your Fish

Fish Grading Machines

With our patented Fischtechnik belt-grading-system fish are graded gently and with high precision.

- Easy handling
- Maintenance free machine and motors
- Grading speed infinitely variable
- Made of seawater resistant aluminium
- Operation with fish pump, air-lift or by hand netting
- Standard models with pneumatic tires
- Manufactured in our own Fischtechnik-factory
- Individual adjustments possible
- Special installations in combination with fish pumps or air lift aggregated on trailers, rafts or boats are possible

Standard-designs

FGM 2

Size range 5-1500g

Most successful model for grading all commercially important fish species from fingerling to market sized fish. The grader is equipped with a large inlet hopper to be fed by high performance fish pumps.

FGM 2

FGM 4

Size range 1-200g

Standard machine for fingerling and smolt production. These machines are already in use for grading salmon, trout, sea bream and carp all over the world.

FGM 4

FGM 5

Size range 5-1500g

Double-belted grader for very high turnover per hour with Fischtechnik grading precision. This grader is perfectly suited for big fish farms.

FGM 5

FGM 6

Size range 100-8000g

The suitable grading machine for larger fish, starting from 100g upwards.
