PROJECT MANAGER

Water Management Technologies Inc. (WMT) designs and installs fish production systems for commercial, academic and government entities worldwide. WMT seeks a professional application engineer whose past work experience demonstrates a “hands on” proficiency in design, and installation of Aquaculture Re-circulating Systems (RAS). Mechanical and electrical skills required. Candidate must possess the ability to work independently, generate sales and instill customer confidence. Strong computer and writing skills a must. Cadd proficiency required.

The individual will accept responsibility for the following:

- Project Management from inception to completion of various WMT products such as LHO's,
- Microscreens, Monitoring Systems, as well as complete RAS.
- Sales of aquaculture products both inside and outside of the office.
- Travel to job sites to ensure equipment is installed and operating properly.
- Create estimates based on design.
- Assist WMT employees with inventory management, and construction of WMT products.
- Assembly and production of water treatment equipment for the aquaculture industry.

Compensation: Commensurate with experience.

Holidays: The following are paid holidays after one year of employment: Christmas, New Years, Thanksgiving, Good Friday, July 4th, Labor Day.

Vacation: One week paid vacation after 12 months of employment. Two weeks paid, thereafter.

Benefits : Major medical, no dental, Blue Cross, Blue Shield of Louisiana, Simple IRA after one year of employment. WMT contribution matches up to 3% of employees' contribution.
