

OxyGuard MiniTemp

Thermometer

The OxyGuard MiniTemp, shown here in 75% of natural size, is a small electronic thermometer specially designed to meet the demands of fish farmers and other professional people for a rugged, reliable and accurate thermometer. It has a measuring range of -5 to $+45^{\circ}\text{C}$ with an accuracy of $\pm 0.1^{\circ}$, and will measure up to 60°C with an accuracy of $\pm 0.2^{\circ}\text{C}$. The probe is manufactured in plastic and sea-water resistant bronze, and is connected to the display with a 1.5 m cable.

A small pushbutton on the top of the instrument switches it on for approximately 2 minutes. This ensures maximum battery life. Both probe and display are sealed and waterproof.

Order Number H03A.
